Dear Property Owner,

The Alliance for Building Communities and the Tamaqua Blueprint Communities Team are sponsoring an Upper Floors Market Study of the upper stories of Tamaqua's Main Street Historic District (from Nescopec Street to the Little Schuylkill River). The study will be performed by Schroeder and Schroeder Consulting, PO Box 88, Barnesville, PA 18214.

The Market Study will include a survey of each building in the designated district and a questionnaire which will be provided to the building's owner(s). The study is being performed to determine if, with some renovations, some of these upper-story spaces could lend themselves to commercial, residential, retail, light industrial and perhaps other uses. Additionally, the study will be used to promote the development of upper-story spaces in this district.

Building owners are requested to complete the attached questionnaire about their building and assist in scheduling a visit to the building by the survey team. Additional information will be gathered by the survey team during its visit to your building. Owner's are requested to allow access to the upper floors in order to obtain accurate data. **Please contact the survey team at 570-449-1531 to schedule a visit to your building, or to address any questions or concerns you may have.**

Copies of the completed study will be made available to all cooperating building owners upon conclusion of the study.
