

My Blueprint for Aliquippa

My blueprint for making Aliquippa a better place to live has three parts.

They are eliminating the bad elements, improving the appearance, and making people want to live, work, and visit Aliquippa.

First, to eliminate the bad elements we need to not allow anyone under the age of 21 to purchase a gun or get a license to carry a gun. We could teach the kids and adults to get along and to learn that violence will not settle anything but, make it worse. We could also have a larger police force, fire and safety station. We should not need security guards in schools or in the streets. That is triffin! We should be able to walk the streets without worrying about getting robbed or hurt. We should not worry, but relax knowing we will be safe.

To improve the appearance, we could have the streets paved and have the street cleaner come once a week. That way the first thig that people notice is, Wow, No bumps!! We need to stop littering and recycle. We could plant flowers in bare areas and build parks for the kids too play at. Also, we need to demolish all old, abandoned buildings and build new buildings that will in the future become business' that will enable us to provide more jobs for our people.

Last but not least, To make people want to work, live and visit Aliquippa we need to build decent homes that are actually habitable. We also need to remodel school buildings so they don't look so torn up! We also need a community center and a student relief program for those in need. We should also have clean, friendly restaurants for people to eat at so that people in Aliquippa do not have to go out of town for a good meal! I am sure that you know, gas prices have gone up A LOT!!!! So, that is what I think we should do to make Aliquippa a better place to live.
