# How to make our town a better community

For Hamburg to be a better community there should be a center for children of all ages to have a place to be after school and on weekends to have a good time.

I think a youth center in the community would make Hamburg a better place. This would be somewhere children and teens would go to be children and participate in many activities. This would be a place where teens would help other teens and children with their homework, and problems that they have in their life. There could also be sports teams or sport activities. Like basketball courts football/soccer field, a gym. There would also be computers to do homework, and listen to music and use the internet. A small library of books that are interesting to the children and teens. There would also be a very small section where orphaned animals could stay until they found a home.

For older teens this center could offer a program where these teens get experience in learning how to fill out job applications, how to make resumes, how to take a job interview. Students can get mentors that help them figure out career choices that interest them. The students can visit local businesses that interest them and try out their skills. During the summer receive internships at that local businesses.

These children and teens could volunteer to help clean the town. A cleaner town would make the community of Hamburg a nicer place and more enjoyable place to live.

They could also volunteer at schools, with tutoring ect., and help with sport activities.

A youth center in our community would help take away some of the trouble with teens around the town. Less kids getting into trouble because they have a place to spend time with friends, a place to get their homework out of the way, so they can relax, and have a good time.

In conclusion having a youth center in our community would help our town out greatly.
