

Hi! My name is Cashmere and I am going to tell you about what I would do to make our community a better place to live. First I will talk about making a community job center and I also will be talking about how we can clean up the community once a month. The last thing I will be talking about is what we can do for the kids and how we can help the kids out.

What I would do first is make a community job center for people who need jobs. This would be a thing to do for people who need a job and cannot get a job. They can come to the community job center and we can help them get a good job so they can get far in life. We can also teach them about the jobs so they can learn how to do the job before they start and we can have a mini college for some people too. It will be free but if they want tutoring they have to pay a little bit of money.

Another thing I would do is a Community Clean up Day so we can make the neighborhood clean and make it a nice, and safe place to live. On this Community Clean Up Day there will be people from all over the city cleaning and looking to see if stuff is still in good shape and of course clean. People will also build up things that need to be fixed up.

Cashmere Young

The last thing I would do to help the community is make places for kids, like parks, and make them bigger and safer places to be. Also, I would have fundraisers to raise money for the disabled, schools, programs, the homeless, and people who need a house or that just need help.

This is what I would do to make our community a better place to live. I hope these dreams come true so we can live a better life and stay safe in our community.
