

### Problem Statement

X neighborhood lacks decent and affordable housing, and has numerous vacant and dilapidated buildings.

### Goal

To improve existing housing, and create new affordable housing (note: this is your overall housing goal from your BC plan)

## Logic Model Diagram: BC Ellijay: Housing Goal/Program

### Long-Term Outcomes

25 New Single Family Homes developed in target area.

### Rationales

Improved and affordable housing will entice new residents into X neighborhood, and improve the quality of life for existing residents.

### Assumptions

Marketing/housing study demonstrates need and potential market for affordable housing in X neighborhood (e.g., from market study if you conduct one, or from other research on housing needs in your community)

### Resources

FHLB AHP program.  
(note: other potential resources in your community, e.g., from the city, philanthropic organizations, state government, etc.)

### Activity Groups

NOTE: These would be the same activities that you develop in your BC plan

### Outputs

NOTE: These would be the direct outputs, e.g., completed market study, housing plan, etc.

### Intermediate-Term Outcomes

Specific buyers and funding secured.

### Short-Term Outcomes

For example, sites secured for housing project.
